D0145 oral evaluation for a patient under three years of age and counseling with primary caregiver
Diagnostic and preventive services performed for a child under the age of three, preferably within the first six months of the eruption of the first primary tooth, including recording the oral and physical health history, evaluation of caries susceptibility, development of an appropriate preventive oral health regimen and communication with and counseling of the child’s parent, legal guardian and/or primary caregiver.

D0415 collection of microorganisms for culture and sensitivity

D0417 collection and preparation of saliva sample for laboratory diagnostic testing

D0418 analysis of saliva sample
Chemical or biological analysis of saliva sample for diagnostic purposes

D0421 genetic test for susceptibility to oral diseases
Sample collection for the purpose of certified laboratory analysis to detect specific genetic variations associated with increased susceptibility for oral disease such as severe periodontal disease

D0425 caries susceptibility tests
Diagnostic test for determining a patient’s propensity for caries.

D1110 prophylaxis – adult
Removal of plaque, calculus and stains from the tooth structures in the permanent and transitional dentition. It is intended to control local irritational factors.

D1120 prophylaxis – child
Removal of plaque, calculus and stains from the tooth structures in the primary and transitional dentition. It is intended to control local irritational factors.

D1203 topical application of fluoride – child

D1204 topical application of fluoride – adult

D1206 topical fluoride varnish; therapeutic application for moderate to high caries risk patients
Application of topical fluoride varnish, delivered in a single visit and involving the entire oral cavity. Not to be used for desensitization.

D1310 nutritional counseling for control of dental disease
Counseling on food selection and dietary habits as a part of treatment and control of periodontal disease and caries.

D1320 tobacco counseling for the control and prevention of oral disease
Tobacco prevention and cessation services reduce patient risks of developing tobacco-related oral diseases and conditions and improves prognosis for certain dental therapies.

D1330 oral hygiene instruction
This may include instructions for home care. Examples include tooth brushing technique, flossing, and use of special oral hygiene aids.

D1351 sealant – per tooth
Mechanically and/or chemically prepared enamel surface sealed to prevent decay.

D1352 (NEW) preventive resin restoration in a moderate to high caries risk patient-permanent tooth
Conservative restoration of an active cavitated lesion in a pit or fissure that does not extend into dentin; includes placement of a sealant in any radiating non-carious fissures or pits.

D9630 other drugs and/or medicaments, by report
Includes, but is not limited to oral antibiotics, oral analgesics, and topical fluoride dispensed in the office for home use; does not include writing prescriptions.

D9920 behavior management, by report
May be reported in addition to treatment provided. Should be reported in 15-minute increments.

D9970 enamel microabrasion
The removal of discolored surface enamel defects resulting from altered mineralization or decalcification of the superficial enamel layer. Submit per treatment visit.
